

# ASTM International Technical Committee B08 on Metallic and Inorganic Coatings

## Scope

The scope of the Committee is (1) metallic and inorganic coatings on products and (2) electroformed materials and products. The scope includes: (1) development and preparation of specifications, methods of tests, practices, guides, definitions, and terminology applicable to the properties of the coatings and electroforms, to their performance in use and test, and to the processes and materials used to produce them, (2) organization and presentation of relevant symposia and other meetings for the dissemination and exchange of technical information and (3) publication of Special Technical Publications and other special documents.

Coatings covered in the scope include, but are not limited to, those produced by electroplating, autocatalytic (electroless) plating, immersion plating, vacuum processes (such as vacuum metallizing, sputtering, and ion plating), chemical conversion (such as chromating, phosphating, and black oxide), anodic oxidation (such as anodization of aluminum, magnesium, and zinc), hot dipping (such as with molten tin, tin-lead alloy and zinc), thermal coating processes (such as flame spray, chemical vapor deposition, plasma spray, and detonation coating), porcelain enamel and ceramic-metal coatings fused at temperatures greater than 427 C (800 F). Excluded from the above scope are sheet, wire, and tin mill products.

## Technical Subcommittees

- B08.01 Ancillary Activities
- B08.02 Pre Treatment
- B08.03 Engineering Coatings
- B08.04 Precious Metal Coatings
- B08.05 Decorative Coatings
- B08.06 Soft Metals
- B08.07 Conversion Coatings
- B08.10 Test Methods
- B08.12 Materials for Porcelain Enamel and Ceramic-Metal Systems
- B08.90 Executive

## Key Documents

- B456 Standard Specification for Electrodeposited Coatings of Copper Plus Nickel Plus Chromium and Nickel Plus Chromium
- B545 Standard Specification for Electrodeposited Coatings of Tin
- B571 Standard Practice for Qualitative Adhesion Testing of Metallic Coatings
- B633 Standard Specification for Electrodeposited Coatings of Zinc on Iron and Steel
- B733 Standard Specification for Autocatalytic (Electroless) Nickel-Phosphorus Coatings on Metal
- B912 Standard Specification for Passivation of Stainless Steels Using Electropolishing
- B1023 Standard Test Method for Abrasion Resistance of Hard Anodic Coatings by a Taber-Type Abraser

## Quick Facts

**Established** 1941  
**Number of Members** 150  
**Number of Standards** 132  
**Global Participation**  
 9 Countries represented  
**The standards are available in**  
 Volume 02.05 in the *Annual Book of ASTM Standards*  
**Meetings** B08 meets twice each year, in May and November

**Staff Manager**  
 Jennifer Tursi
