

# ASTM International Technical Committee C12 on Mortars and Grouts for Unit Masonry

## Scope

The formulation of specifications, test methods, terminology, guides and practices relating to the use of mortars with masonry units of burned clay or shale, sand-lime, concrete, stone and other similar materials, except refractories.

The Committee shall encourage research on the use of mortars and grouts with masonry units.

The work of this Committee will be coordinated with other ASTM Committees and other organizations having mutual interest, especially ASTM Committee C15 on Manufactured Masonry Units.
