

ASTM International Technical Committee D31 on Leather

Scope

The development and evaluation of standard test methods, specification, classifications, definitions, and practices for leather.

The area of interest of the Committee also includes the assessment of materials used to produce leather and of the ability of the resultant leather to meet end-use performance requirements.

The work of this Committee will be coordinated with other ASTM Committees and other organizations having mutual interests.

Technical Subcommittees

- D31.01 Vegetable Leather
- D31.02 Wet Blue
- D31.03 Footwear
- D31.04 Apparel
- D31.05 Upholstery
- D31.06 Chemical Analysis
- D31.07 Physical Properties
- D31.08 Fats and Oils
- D31.09 Recycled Leather

Key Documents

- D2099 Dynamic Water Resistance of Shoe Upper
- D3495 Standard Test Method for Hexane Extraction of Leather
- D4705 Stitch Tear Strength of Leather, Double Hole
- D5052 Permeability of Leather to Water Vapor
- D5053 Standard Test Method for Colorfastness of Crocking of Leather
- D7255 Abrasion Resistance of Leather (Rotary Platform, Double-Head Method)

Quick Facts

Established 1971

Number of Members 50+

Number of Standards 131

The standards are available in
Volume 15.04 in the *Annual Book of ASTM Standards*

Meetings E31 meets once each year, in April
