ASTM International Technical Committee E29 on Particle and Spray Characterization

SCOPE

The promotion of knowledge, the stimulation of research, and the development of recommended practices and general methods for characterizing solid and liquid particles. Standard specifications for apparatus and techniques required for such purposes shall be promulgated.

The Committee will coordinate related methods and specifications that are under the jurisdiction of other technical committees so as to promote uniformity in methods of particle size measurement. The Committee will also cooperate with other standardization bodies in the pursuit of national and international uniformity in standards and methods for particle size measurement.

The Committee shall be concerned with all aspects of particle size measurement.
